PROJECTS

Food Service's App

JULY 2023 – PRESENT

Next, Emotion, Jest, Figma

Building a project from scratch based on Figma mockups. Implemented using Next.js along with Emotion for styling. Achieved 65% unit test coverage with Jest.

Confirm Identity App

MAY 2022 – OCTOBER 2023 (1 year 5 months)

React, TypeScript, Team Leading, SASS

Leading a team in a identity proofing project for Microsoft Teams application.

e-PIT Application

JANUARY 2022 – FEBRUARY 2022 (2 months)

WCAG, Vue, SASS Modules

Incorporate WCAG standards into the project to satisfy minimum web accessibility guidelines.

dom4you.pl

DECEMBER 2021 (1 month)

Vanilla JS, Webpack 5, Figma

Programming a website for a private client about building heat pumps using vanilla JS with Webpack 5. The project was designed by a professional UX/UI Developer.

e-Tax Office

JANUARY 2021 – FEBRUARY 2022 (1 year 1 month)

Vue, TypeScript, Team Leading, WCAG
Vuex, SASS Modules, Atomic Design, Storybook

Working as a contractor on a project for the public sector client. Creating an online tax office. Developing and team leading the team to create reusable components for all the related websites. All the components were compliant with WCAG standards and met minimum AA requirement.

One Screen Medical Procurement App

MARCH 2020 – JANUARY 2021 (10 months)

Vue, TypeScript, Vuex, SASS

Creating a new application from scratch using data from Medical Procurement App to provide full procurement experience on one screen. Allowing the user to see and make changes for most of the scenarios at once. Also building a new section allowing advanced orders comparison.

Medical Procurement App

AUGUST 2020 – FEBRUARY 2021 (9 months)

Vue, Vuex, Frontend Tech Lead, SASS

Working for one of the leading pharmaceutical company in the industry as a Frontend Contractor, later also as Frontend Tech Lead. As a team, we were creating complex Medical Procurement Application fully customized and used for users all around the world.

Company Managing Application

MAY 2019 – JULY 2019 (3 months)

React, React Hooks, Redux, SASS

Working in a team to provide the most optimal and efficient application. Creating frontend of the application used for managing employees, projects' assignments and contractors within a company. The app is functional for different positions: developers, admins, project's managers and recruitment specialists.
